Most of the charges against patent medicines as a class have no foundation in fact and are manifestly unfair and unjust. There are a large number of standard remedies like Lydia B. ## WAR STOCKS QUIET, WITH EASIER TONE

Year's Record Shows Spectacular Advances, Bethlehem Rising 227 Points.

"Yes!" broke in the deep voice which haunted Kitty's memory, "I suppose so; but what would we do if we could not pay our troops the next day? How much better off than Gretzhoffen would then be our own case? No, Frederick is right in his main plan. The throne alone is worth nothing—it is worthloss in his king dom or in our kingdom or in any other—a poverty-stricken kingship is no business for any man. Why have you not a diagram of the treasure's burial place—with that, now, the matter would be somewhat different tonight."

Whe war stocks awakened only an irregular interest at the opening of the market to-day. The market itself was quiet but strong. The volume of trading materially decreased. Bethlehem Steel opened at 260, recovering three points of the net loss of yesterday. Crucible Steel, however, started the day at 691-2, fractionally below the close.

Chalmers, 1,500 shares being lumped whisper. Apparently warned, at least, by their suspicions, they moved away, although Kitty shifted her own posiat the opening, which was at from \$2 to \$21-2, an advance of from 3-4 although Kitty shifted her own position so that her presence was not known.

"So now," she thought to herself, "there are still other enemies for this little unfortunate kingdom of Gretzhoffen. Its neighbor kingdom plans war against it—its own king is helpless—its people are oppressed—its noblemen are, perhaps, treacherous.

What is to be done in such a case?"

Was it Count Sachlo's voice she had heard—was he, the king's friend, the state of the market, trading starting at 101 1-2. This was due to a good

consciously reverting to her own vernacular. "I'll see it through!"

The two men whose talk she had overheard passed now from behind the pillar toward the interior of the palace. Apparently they were known there and were welcome for surely

spectacular advances which several of the issues have made in the year that ended with last night's closing. Most spectacular of all is Bethlehem Steel Common, which, at the last sale on July 30, 1914, stood at 30. It closed yesterday at 257, a rise of 227 points. The preferred climbed in that period from 79 to 1314.

Republic Steel also made a diszy climb from 1814 to 95%. Studebaker went from 65% to 83%, and Westinghouse advanced from 65% to 111%.

American Locomotive and Baldwin both soared, the former climbing from 20% to 54, and the latter from 41 to 80. U. S. Steel and Lackawanna Steel went up also, the first going from 51% to 66%, and the second from 26% to 50%.

American Can gained 37% points, going from 1916 to 57%; General Motors led its field with a climb from 58% to 180, an advance of 121% points. Goodrich started at 20 and closed yesterday at 50%. the great palace and in all Gretz-hoffen that night—confusion, uncer-

Frock Not Only Makes The frock at the left is quite pic-

clearly what forethought in this respect her mother has accorded her. Sensible, plain little dresses for playtime bespeak refinement, but when playtime is over a dainty, modish little afternoon frock is no more than sense of style, which will afterward develop into a personal attribute, but it makes the little girl appreciative of her clothes to the extent of careful of them, thus aiding in the development of neatness.

Such frocks do not have to be elaborate, but a dainty, inexpensive material can be developed distinctively on simple lines. As an example, either one of the two very different frocks I have designed for to-day will serve admirably.

### DESCRIPTION OF FROCK.

For the siender, vivacious, petite girl, the ruffled frock at the right would be pretty. Of fine white batists or organdy, the straight full skirt is made fuller by three narrow ruffles near the bottom. Below them a band of transparent lace delicately emphasizes the original width of the emphasizes the original width of the skirt. The same sort of lace on the waist is given a more conspicuous part, being used for a wide square yoke into which flaring sleeves are set. The effect is delightful in combination with the three narrow ruffles which comprise the whole lower part of the waist. Should the use of lace be considered too claborate, embroidered batiste in an allover pattern would do well. Also a finely striped dimity in some color would create a real modish effect for the yoke and sleeves and the skirt band, with all the rest of the frock plain white. A sash of colored
